

## The Chinese New Year starts on the Aquarius New Moon from 2009 to 2044

These dates are calculated from Universal Time so may actually happen the day before or after depending on your Time Zone.

The Chinese New Year is determined by the Aquarius New Moon as it occurs in China. Each year features one of 12 Animals and one of the Five Chinese Elements. The original transmission for the Chinese New Year was based on Jupiter (known as the year star) because this planet takes about one year to move through one constellation or as looked at in current times sign of the Zodiac. Signs and Constellations are NOT the same. See article

Year	Date	Animal	Element
2009	January 26	Ox	Earth
2010	February 14	Tiger	Metal
2011	February 03	Rabbit	Metal
2012	January 23	Dragon	Water
2013	February 10	Snake	Water
2014	January 31	Horse	Wood
2015	February 19	Sheep	Wood
