### The 18 Day Wave Pulses From March 9 to October 28, 2011 elaborated on by Simeon Nartoomid

<http://www.cosmicconsciousnessonline.com/13-Universal-Heaven-Pulses-of-Light.html>

**1st Heaven-Pulse** ... March 9 - 26 (crest March 17-18) *Yang* Sowing, initial infusions and expressions of new consciousness are placed within the fertile coil created by all eight previous Rainbows or Harmonic Waves of Consciousness Evolution.

**2nd Heaven-Pulse** ... March 27 - April 13 (crest April 4-5) *Yin* Assimilation and Integration of the 1st Heaven-Pulse. The "seed" gets acclimated to the soil it has been placed within and alchemical internal processes prepare for its germination.

**3rd Heaven-Pulse** ... April 14 - May 1 (crest April 22-23) *Yang* Germination, the second expansive pulse of new universal consciousness energies building upon that which was sowed in the first universal Heaven-Pulse of Light. The seed of universal consciousness now undergoes an outer transformation and begins to break free of its initial containment field.

**4th Heaven-Pulse** ... May 2 - 19 (crest May 10-11) *Yin* Adjustments, reactions and deeper internalization of the new universal consciousness harmonics building and becoming much more prominent. Development of all that is needed still below the surface of the fertile soil to support the first upward thrust of universal consciousness into the light of human awareness in the next Heaven-Pulse.

**5th Heaven-Pulse** ... May 20 - June 6 (crest May 28-29) *Yang* Sprouting, the new universal consciousness now starts to take deeper root in form and become more firmly established. The newly developing universal consciousness now breaks through the surface of the fertile soil of its initial underworld developmental phase and pushes its stalk of new growth up into the light of human conscious awareness where it becomes more clearly visible.

**6th Heaven-Pulse** ... June 7 - 24 (crest June 15-16) *Yin* Assimilation and reflection upon the new foundation of universal consciousness emerging in our lives and in our world. This phase is also akin to watering the new shoot, watching and waiting for it to grow the extra roots necessary to support further growth.

This is a very important Heaven-Pulse for us to intently focus on entraining our minds and feelings to see and experience what IS happening in terms of universal consciousness development in our world and to make a final break from the dire negative outlook presented in the media if we have not already done so.

**7th Heaven-Pulse** ... June 25 - July 12 (crest July 3-4) *Yang* Proliferation and more solid developmental growth of universal consciousness which forms the next level of its emergence as a pertinent liberated expression in our experience and on the planet. The new sprout is becoming a more mature and healthy plant.

**8th Heaven-Pulse** ... July 13 - 30 (crest July 21-22) *Yin* Bridge building phase that harmonically establishes sturdier and more numerous pathways for existing older forms of consciousness to merge into the new universal consciousness with grace. The plant starts preparing internally for the climax phase of its life wherein it will produce flowers and seeds. This requires more internal alchemy to take place which represents another full turn on the alchemical spiral in resonance with the 2nd Heaven-Pulse.

**9th Heaven-Pulse** ... July 31 - August 17 (crest August 8-9) *Yang* Budding, universal consciousness now nears fruition and prepares to issue forth great beauty as it reaches for the Great Central Sun to nourish it and to help it produce good seeds for continuing consciousness evolution within us.

**10th Heaven-Pulse** ... August 18 - September 4 (crest August 26-27) *Yin* Dissolution, a deep passage into the underworld where old forms which have resisted transformation undergo dissolution within the frequency of the newly emerging universalized consciousness plunging ever deeper into the collective consciousness.

The bud waits for the perfect moment when conditions will be just right for flowering. It must wait out the weather and everything must move in response to its need for the perfect environment wherein it can open to display its true beauty and thereby succeed in being pollinated.

**11th Heaven-Pulse** ... September 5 - 22 (crest September 13-14) *Yang* Flowering, a renaissance which represents the new protoform exemplifying the higher expressions of the new universalized consciousness. The bud opens into a flower and draws upon nature to fertilize her so she may produce seeds with the right information to nurture and grow more universal consciousness within the fertile ground of all beings.

**12th Heaven-Pulse** ... September 23 - October 10 (crest October 1-2) *Yin* Relaxation of forward movement to allow some fine-tuning of the universal consciousness that is rapidly gaining strength. The flower rests and waits for the Higher Solar Bees to come visit - Archangel Arhaniel, the Solar Lords, the Solar Christ.

**13th Heaven-Pulse** ... October 11 - 28 (crest October 19-20) *Yang* Fruition, the final harmonics of the universal consciousness evolution are put into place by the Cosmos and manifestation of the highest forms of this new consciousness become possible. The flower has been pollinated by the Higher Solar energies and produces seeds of universal consciousness which are spread far and wide by the winds of Spirit within human consciousness.

*The Bolon Yookte, the Nine-step God with its Nine Underworlds, as this is symbolized by the Pyramid of the Jaguar in Tikal. The Nine Underworlds will all be completed, "the Bolon Yookte will descend", at the same time and to symbolize this synchronistic event the pyramid has a straight back. Photograph by the author.*

**Note:** As I understand this...the Cellular Underworld took about 14 Billion years to complete. Each underworld after that went 20 times faster. The Planetary Underworld took 20 years to complete each of the 13 phases or about 260 years. The Galactic Underworld went through all 13 phases in 13 years or one year for each phase. The Universal Underworld is completing each phase in 18 days from March 9, 2011 to Oct 28, 2011.
