The Total Solar Eclipse is exact 2:36 am Pacific Time on March 20 just about 13 hours before the Exact Equinox. Uranus and Pluto are still within 8 minutes.

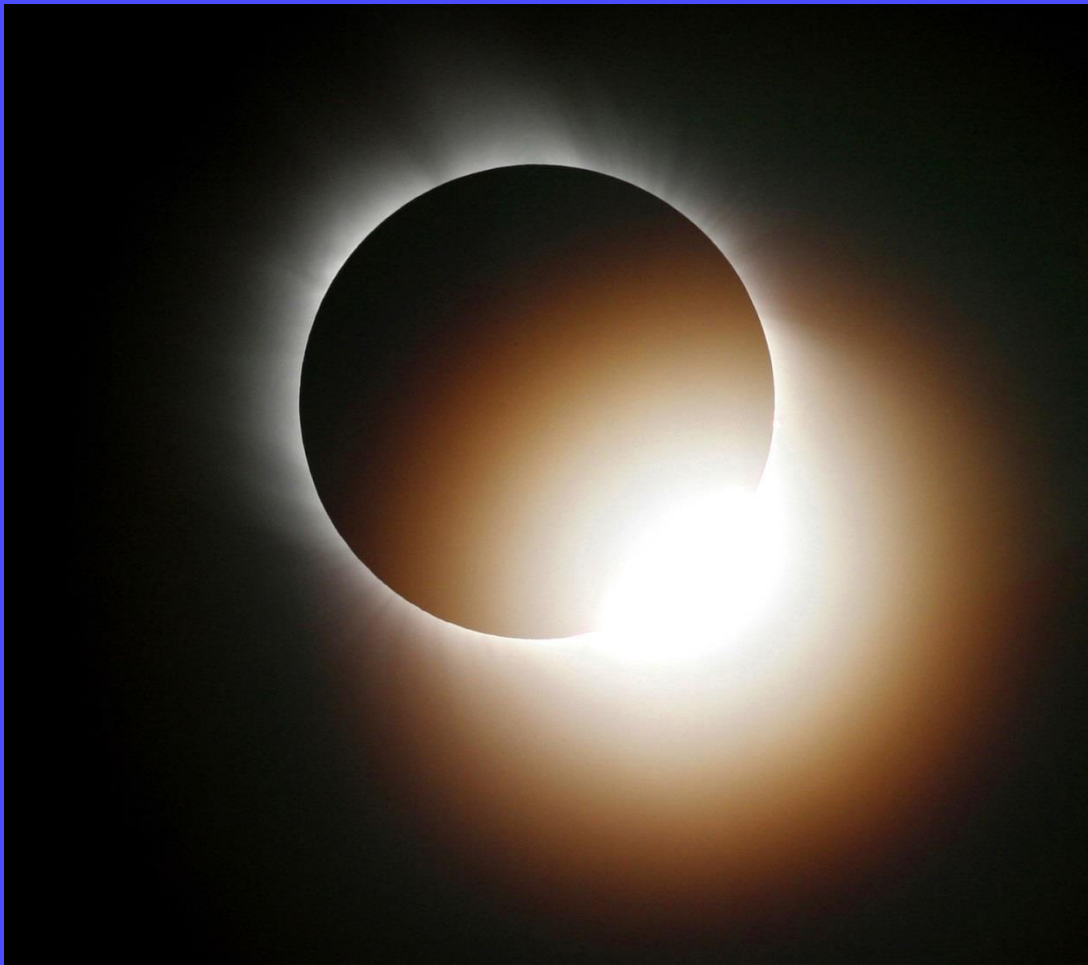

Solar Eclipses open portals into new possibilities. The Moon passes between the Sun and the Earth blocking the light of the Sun. This means the Sun is reborn twice in one day. Another way to view this a doorway is opening into the mysteries creating opportunities for personal transformation and rebirth into even more conscious ways of living and being.

**From the ashes a fire shall be woken,
A light from the shadows shall spring;
Renewed shall be blade that was broken,
The crownless again shall be king.**

Lord of the Rings – JRR Tolkien
